Explore the various waterholes along this enormous saltpan. Lunch stop at one of the rest camps (lunch excluded). Encounter the big variety of wildlife in the Park during the course of the morning. More than 114 mammals species are found in the Park, several of them are rare and endangered like the black rhino of the black faced impala. You have a great chance of seeing some of the bigger mammals, like elephant and rhino and of course a highlight in any safari, the predators.

Another full day in the Park lies ahead of us. We will drive along the vast saltpan, which is called the "great white place of dry water" in a local language. In some years, after heavy rain falls, thousands of flamingos come from the coast for breeding. The pan is also rich in minerals and offers a great nutritious supplement to the all the animals. It attracts herds of antelopes and the predators that follow their prey.
